

COSMOPAK 

Innovating the essentials of care

ABOUT US

DESIGN AND SUSTAINABILITY WITHOUT LIMITS

The industry evolves, and so do we. For over **40 years**, we **have been building strong partnerships** with leading hotel chains and hospital groups in Spain, offering natural and sustainable cosmetics.

- Real commitment to the planet and innovation.
- Unique experiences for guests.
- Quality, efficacy, and sustainability in every formula.

Our future is clear: to continue growing as leaders in manufacturing and sustainability, making a difference in the industry.

Let's move forward together toward a greener world!

OUR VISION

CORPORATE STRATEGY

Since the beginning, **Cosmopak** has been committed to hard work, customer dedication, and, above all, fulfilling our commitments.

Commitment to society reflected in five pillars:

- Ethics, integrity, and professionalism in every action.
- Respect for the economic, social, and natural environment.
- Innovation to drive infrastructure development.
- Promotion of employment and well-being as an economic driver.
- Rigorous management for sustainable growth.

These values not only define us but also **drive us to keep moving forward.**

Our Commitment to Quality and Sustainability

We ensure transparency and measurable impact through internationally recognized certifications. Our dedication to sustainability and continuous improvement is reflected in:

- **ISO 9001 & ISO 14001** – Quality and environmental management.
- **GMP & FDA Approval** – Safe and responsible manufacturing.
- **EU Ecolabel & Carbon Footprint Reduction** – Sustainable product commitment.

Transparent evaluation, constant evolution, and a commitment to a more responsible future.

We don't just meet standards, **we exceed them.**

MISSION

SUSTAINABLE LEADERSHIP

We embrace **circular economy** to ensure a sustainable future. Our experience has made us **leaders in an evolving industry**, driven by biodegradable materials and energy efficiency.

- Innovation and sustainability in every step.
- Responsible production with a positive impact.
- Leaders in ecology and sustainable development.

We work every day to keep growing and lead the change towards a greener future.

PRODUCTION

We have our own production center in Portugal, ensuring quality

8,000 m² production center.

148 m automated warehouse.

Capacity for 4,000 pallets.

Production of 150,000 dispensers per day.

100% automated processes.

Comprehensive development of new products.

Manufacturing of cosmetics, bottles, and holders.

Compliance with European and FDA regulations.

Strict sanitary controls.

FORMULAS

Safe formulas with advanced technology.

High-quality natural ingredients.

Natural extracts for maximum benefits.

Sustainable and responsible development.

Free from harsh chemicals.

Innovation in every composition.

Compliance with the highest standards.

Effective and skin-friendly cosmetics.

Balance between science and nature.

Guaranteed safety and performance.

Quality control.

PIONEERS IN ROBOTIC TECHNOLOGY

Robotic innovation for more efficient production.

Advanced technology serving cosmetics and sustainability.

Comprehensive production: from formulation to final design.

Efficiency and precision with the latest robotic technology.

Leading the future of production with intelligent automation.

LOGISTICS

PUNCTUAL AND HIGH-QUALITY SERVICE WORLDWIDE

We operate a **global distribution** network with logistics platforms in Madrid, Barcelona, Oporto, Miami, the Dominican Republic, Mexico, and Hong Kong. Our **10,000 m² structure** ensures efficient management, delivering over 85% of orders within 48 hours.

We guarantee a **fast and efficient** service, managing logistics and customs with over **500 annual exports**, establishing ourselves as a leading name in the industry.

KM0: QUALITY, SUSTAINABILITY, AND LOCAL COMMITMENT

Proximity is synonymous with **quality and responsibility**. We are committed to local production and distribution, eliminating outsourcing to ensure maximum care in every detail.

- KM0 products, no outsourcing, supporting local economic growth.
- We promote local businesses and encourage employment.
- We reduce our carbon footprint and foster sustainable practices.

Proximity, quality, and sustainability in every step. A responsible model for a better future.

WATER RECOVERY AND REUSE

We have implemented a **water recovery and reuse system** in our factory to reduce water waste.

- Purification and reuse of used water.
- Utilization for cleaning, service, and irrigation.
- A real commitment to sustainability.

Every drop counts on our path to more responsible production.

ENERGY & EMISSIONS

REAL COMMITMENT TO THE PLANET

Greenhouse gas (GHG) emissions are one of the greatest global challenges. We embrace our **responsibility** by designing **sustainable strategies** based on measuring our **carbon footprint**.

Our commitment:

- Continuous optimization of energy consumption.
- Clear objectives for reducing consumption and CO₂ emissions.
- Promotion of renewable energy use.
- Implementation of efficient energy use standards.
- Collaboration with the supply chain to drive sustainable improvements.
- Awareness and promotion of responsible energy use.

We tackle climate change with concrete actions.

A sustainable future starts today.

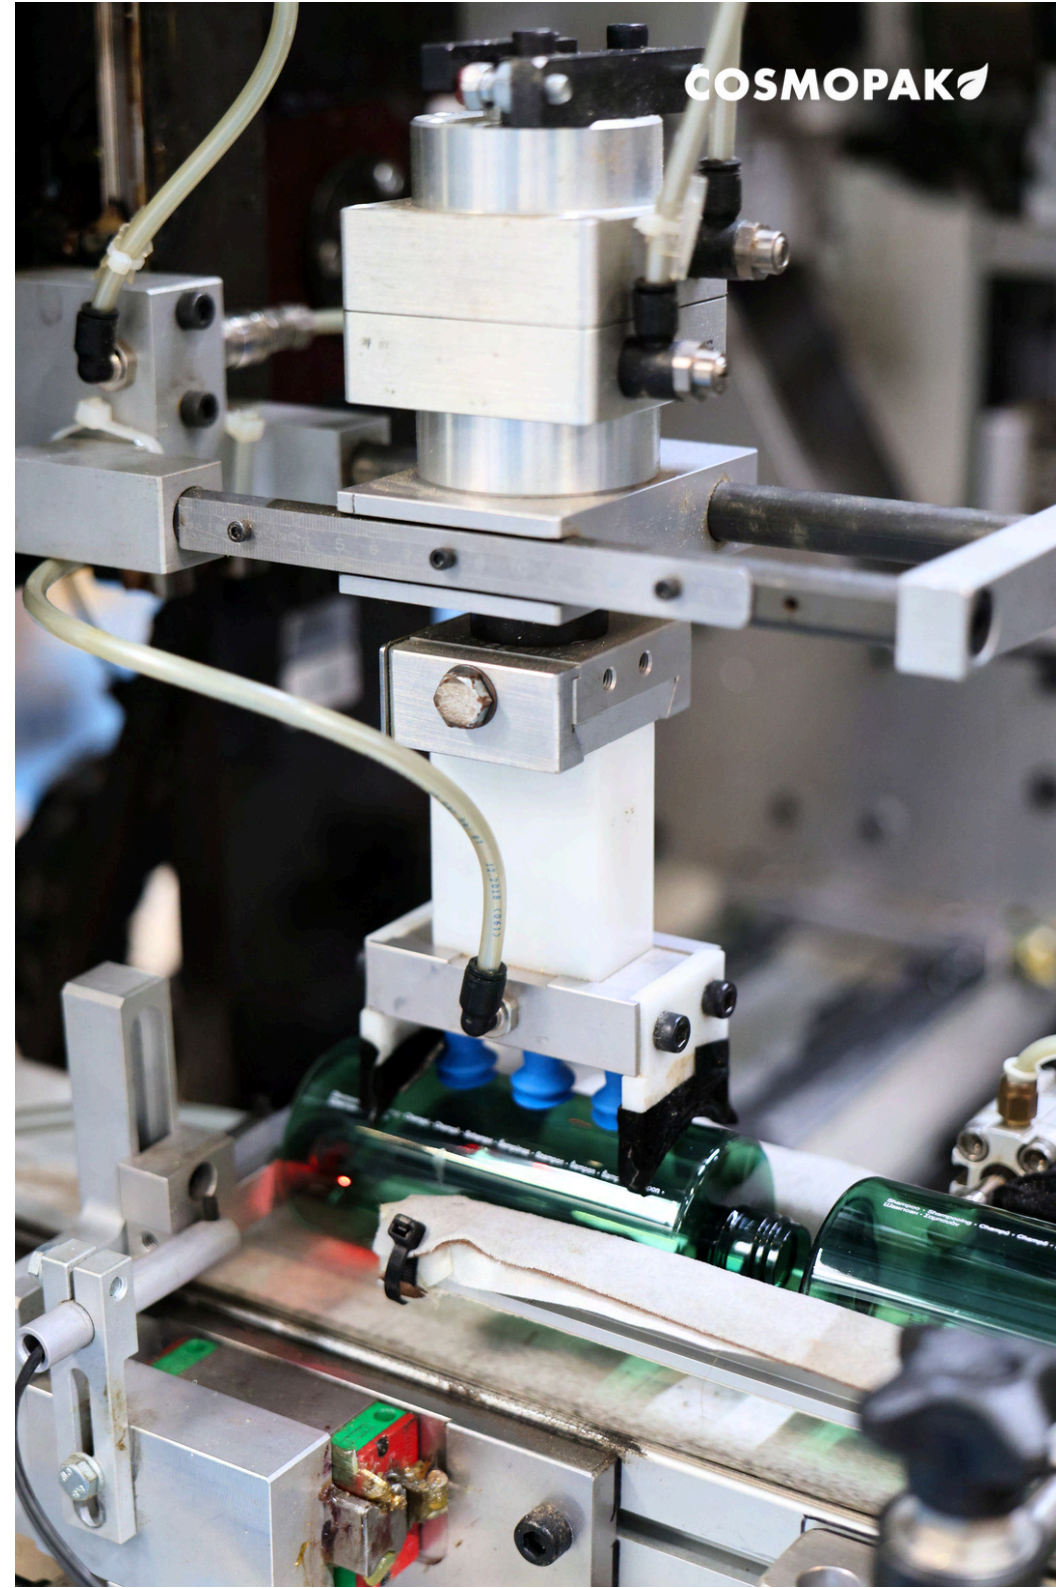

INNOVATION, ENERGY, AND PRODUCTIVE EFFICIENCY

We are **pioneers in robotics**, integrating cutting-edge technology in our **8,000m² production center** to **maximize efficiency and optimize resources**.

- State-of-the-art machinery for optimal performance.
- Commitment to reducing environmental impact.
- 148-meter automated warehouse managing over 2,500 references.
- 70% less plastic compared to other dispensers on the market.
- Logistics cost savings through automation, improving energy efficiency.

We adapt to a **dynamic and demanding market**, ensuring sustainability and innovation at every step.

95%

LESS CARBON EMISSIONS

We promote the use of **wall dispensers**, which significantly reduce CO₂ emissions by using less material and generating less waste.

- Less material, less waste, lower carbon footprint.
- Dosing caps optimize product use and minimize environmental impact.
- A smarter and more sustainable solution for the hospitality industry.

Innovation that cares for the planet!
